Procure-to-payment, pain-free

Grow your profits, not your paperwork (or your payroll)

Managing hundreds of monthly supplier invoices, each with separate payment agreements, can take a lot of time and money. With Concur Invoice, you can speed up your invoice pipeline, with control where you need it.

Approve

Review invoices wherever you're working, even on your smartphone. Your approval generates an automatic purchase order that is transmitted electronically to the supplier.

Capture

Accept supplier e-invoices or paper invoices. Concur's optical character recognition software turns piles of paperwork into something sane: digital line items that all your relevant team members can see, from anywhere, at the same time.

Match

Boost compliance by verifying purchase requests two and three ways with company best practices. Digitally reconcile invoices, purchase orders, and records of received goods to resolve discrepancies efficiently.

Pay

Strengthen supplier relations by paying on time, their way. When you leverage American Express's payment integrated with your existing ERP, you can enjoy Membership Rewards® and rebates.

Save

Take advantage of insights to find savings from the macro to the micro, like optimizing your supply chain or negotiating deals on routine purchases. Plus, the rebates you can earn on American Express purchases can offset the cost of Concur Invoice.

Sound good? Get started now.
